

Paving Asphalt Technical Data Sheet

GENERAL DESCRIPTION

Owens Corning has been an active participant in the asphalt paving industry for over 25 years. All 12 liquid asphalt storage and processing facilities have capabilities for paving products. While Owens Corning provides many basic paving grades of product, there is a commitment to provide modified, blended, and customer specified asphalt paving products. With the help of our certified lab personnel, Owens Corning is focused on niche products within the hot mix asphalt paving, asphalt pavement preservation and maintenance market.

THE PAVING STORY

Beginning in 2015, Owens Corning has dedicated additional resources and placed a renewed focus on serving the asphalt paving industry – expectations are to grow this business and expand Owens Corning’s presence in this market segment.

PACKAGING AND SHIPPING

Although some products are available in packaged cartons, the majority of asphalt paving products are only available for shipment in bulk tankers.

APPLICATIONS AND ADVANTAGES

There are several different paving grade materials that can be used. When comparing Owens Corning® Paving Asphalt to other paving suppliers, Owens Corning® Paving Asphalt has the following advantages:

1. Consistent and repeatable quality characteristics and properties from controlled manufacturing conditions.
2. Readily available due to a nationwide footprint of storage and manufacturing locations.
3. Expanded sales and technical knowledge in asphalt paving, pavement maintenance & pavement preservation.
4. Expertise in asphalt modification materials and technologies provide the capability to achieve a wide range of customer specifications.
5. Backed by quality control laboratories located at each asphalt facility and further supported by the AASHTO/AMRL/SHRP accredited corporate quality R&D laboratory in Chicago, Illinois.
6. Owens Corning’s state of the art research and development facilities in Chicago, Illinois and Granville, Ohio are continuously working on product and process innovation to fully support the asphalt pavement market.
